

FPDS
Ballet / Tap

Company Name : Steps the Studio, LLC

Class / Program Description : The ballet and tap combination class is designed to nurture and cultivate the creativity of all students through dance, music, movement and fun while instilling confidence and a basic technical foundation in both classical ballet and tap dance. This foundation is continually built upon as dancers progress within the program and continue training in the art of dance. The class combines movement and imagination to simultaneously entertain and educate each and every child. Through participation in our dance program, students will gain a strong foundation in multiple dance disciplines, a stronger sense of body coordination/ motor skills development, increased memory and problem solving abilities, and rhythm and music skills. We strive to create and maintain a comfortable, yet challenging learning environment for each and every style of learning in order to cater to each and every individual. Students will also enjoy multiple performance opportunities.

Number of Spots Available: We don't have a limited number of spots available as we will include multiple instructors if needed.
